This brand new, just released study guide—***If God Is Good Study Guide*** by Randy Alcorn is a wonderful companion to the book *If God Is Good*. This study guide includes a 4-week, 8-week, and 13-week studies (you choose your time). This is also perfect for groups but I chose to do this study on my own and found it to be a great guide for my time limits.

Each study is titled the same as the chapter in the book. Then there is a Focus In-overview of the chapter; Interact-more explanation of facts, words in the chapter; Explore Further-Gives many verses to back up chapter being studied; Investigate Further—Want more? Verses that go into more depth. You can do all or chose what interests you. I found the Focus In and Investigate parts to be most helpful to me. However, when time allowed I did go more in depth.

This is a great asset for those who may be teaching or part of a group study. It can be done as an individual study but I feel that a group study will bring out more of the "meat" in the book.

Now the book *If God Is Good* is required reading for this study guide...so I suggest that if you don't have the book buy the book and the study guide together. You will be blessed by this study.
